

Keeping the capital safe

**COMPCO**  
Fire Systems

## Providing fire protection and security in London and the South East

When it comes to safeguarding your people and property from fire, it's good to know your chosen fire-protection contractor is never far away.

With a local team of design engineers, project managers, service personnel and support specialists, COMPCO is dedicated to delivering the finest selection of services to London and the South East.

From designing, procuring and assembling sprinkler systems, to installing and commissioning fire-engineering solutions, we will tailor our service to meet the exact needs of your project.

COMPCO ensures projects are sustainable by using efficient materials throughout. Not only does this demonstrate your commitment to the environment, it also makes sure you comply with the capital's strict environmental policies.

Working with WRAP (Waste & Resources Action Programme), the organisation helping local authorities and businesses reduce waste and recycle, we adopt the top product substitutions using more recycled content at no extra cost. Likewise, we will create and comply with a SWMP (Site Waste Management Plan) as required by the project.

What is more, as COMPCO Fire Systems is LPCB, BAFSA, Construction Line and Safe Contractor approved, you can be sure our service, workmanship and safety meet the highest possible standards.

## Comprehensive fire protection solutions

COMPCO offers complete nationwide fire protection solutions, from consultancy to design and installation. Our portfolio of products and services includes:

- Automatic sprinkler systems
- Hydrant mains
- Wet and dry risers
