

QUALITY ASSURED

Quality and compliance

COMPCO
Fire Systems

Exceeding standards with efficient design

When it comes to safeguarding your people and property from fire, it's always good to know you have an exceptional fire protection system in place.

Exceeding the highest standards demands robust quality controls. With COMPCO, our Quality System, accredited to ISO 9001:2000 by the Loss Prevention Certification Board, will reassure you that you have the right system for your needs. What is more, with certification to design and install automatic sprinkler systems in line with Loss Prevention Standard (LPS) 1048-1, you can be sure our standards meet all industry requirements.

With our designs adhering to British Standard EN 12845, National Fire Protection Association (NFPA) and Factory Mutual Global (FM) Rules, we are approved to perform pre-calculated and full hydraulic calculations (FHC).

Rigorously monitoring all aspects of our business through COMPCO Quality Systems will make sure we proceed through each stage of your project with a keen eye for compliance and quality.

Using qualified engineers

To ensure you receive the quality service you expect, we train our engineers beyond LPCB standards and competencies to include valuable construction design and management skills.

Working on major projects throughout the UK, Ireland and Europe, our engineers are fully experienced in designing commercial sprinkler systems, water mist, wet and dry riser systems, hydrant systems, and domestic and residential sprinkler systems.

So, whatever your needs, you can feel confident our employees have the knowledge to implement the most suitable solution.

Acting responsibly

Protecting the environment is in everyone's interest. That's why COMPCO is committed to minimising waste by recycling and preventing or reducing pollution. For example, a recent review of our transport has significantly reduced CO² emissions.

By continually improving systems throughout the company, we aim to enhance our sustainability for the mutual benefit of the environment, clients, and public alike.

bafsa

Comprehensive fire protection solutions

COMPCO offers complete nationwide fire protection solutions, from consultancy to design and installation. Our portfolio of products and services includes:

- Automatic sprinkler systems
- Hydrant mains
- Wet and dry risers
- Water mist sprinkler systems
- Gas suppression
- Detection and alarms
- Service and maintenance
- 24 hour emergency call out
- **Private sector:** Retail, warehousing, manufacturing, waste recycling, offices, energy plants and industrial complexes
- **Public sector:** Schools, universities, student accommodation, hospitals, care homes and residential units
