

High Cross Quarter - Leicester

Client : Hammersons

Main Contractor : Sir Robert McAlpine

Contract length : 18 Months

A major extension and refurbishment of The Shires Centre in Leicester comprising a new two-level retail mall designed by international firm, Chapman Taylor Architects.

COMPCO were involved from design through to completion.

New pumped water supplies were installed to maintain sprinkler protection while part of the original Centre was demolished.

185 tonnes of fire-fighting water are stored at roof level above the Centre, an engineering feat in its own right. New sprinkler systems were installed throughout the extended centre to protect not only Landlord areas but to provide connections to each unit.

East London Waste Authority - Frog Island

Client : Mouchel / Shanks Waste Solutions

Main Contractor : Mouchel

Contract length : 6 Months

We initially fitted a sprinkler system at roof level to protect the building while the recycling and processing equipment was installed. Subsequently, COMPCO fitted sprinkler protection to the labyrinth of plant and conveyors. Three water storage tanks were installed and a pump house with diesel and electric motors constructed. Testing and commissioning were completed on time and the sprinkler protection was fully operational prior to the site receiving its first delivery of waste.

Thales - Crawley

Client : Crown House

Main Contractor : Crown House Technologies

Contract length : 11 Months

Part of the Project Sapphire works with Crown House Technologies, building D houses production and test areas for aircraft simulators. The project involved pumped water supplies, one 950m³ tank and 2 diesel pumps, feeding 7 separate installations protecting roof, office areas and low level production facilities to FM standards.

Fire Systems

East Grinstead Data Centre

Client : Goldman Sachs

Main Contractor : Crown House Technology

Contract length : 12 Months

A new build Data Centre on the Birches Industrial Estate, East Grinstead. COMPCO designed and installed pumped water supplies, two 74m³ tanks and diesel and electric pumps with 5 pre-action systems protecting the data areas, along with a wet system protecting ancillary areas, with monitoring to BS EN 12845.

iGuzzini - Guildford

Client : iGuzzini

Main Contractor : RG Group

Contract length : 6 Months

The new iGuzzini headquarters in Guildford, Surrey were designed by Paris based architect Pier Luigi Copat in conjunction with Guildford based Architects Lewis & Hickey. The project consists of a 3 story office block and warehouse finished with glass and grey cladding reminiscent in finish to raw cast aluminium, one of the signature materials of iGuzzini luminaires.

COMPCO are proud to have been selected to work on such a prestigious, quality project for one of the largest architectural lighting Companies within the UK market.

The project involved installing roof level sprinkler heads together with twin fire pumps and a 300 cubic metre water storage tank.

Tesco Chester

Client : Tesco

Main Contractor : Barr Construction

Contract length : 9 weeks

A full refurbishment of an existing retail store. This project involved retro fitting of a sprinkler system with storage tank and single electric pump, protecting the sales floor and back of house areas. COMPCO completed this fast track project on time to meet the store opening date.
