Fire prevention solutions for waste management facilities

With local authorities and businesses facing challenging environmental targets, there is an ever-increasing demand for new waste and recycling facilities. However, processing waste safely poses many risks, including the threat of fire.

Working alongside major recycling companies and councils, COMPCO Fire Systems has provided fire suppression solutions to many waste management plants, including:

- Collection and Transfer Stations
- Sorting buildings and recycling centres
- Waste to resources - composting and energy plants
- Organic Green Matter buildings
- Composting halls and peat production areas
- Incineration Plants
- Household waste centres

Providing specialist advice

While COMPCO brings you the latest fire control technologies, we can also provide you with engineering skills and advice you need to ensure your project is a complete success. From advising you on products to helping you select components, our expert team will provide the specialist support required to protect your facilities fully from fire.

Setting the standard

At COMPCO, we perform all installations to the highest quality and standards. What's more, our work is backed by specific method statements, risk assessments, and health and safety policies.

As COMPCO Fire Systems is LPCB Level 4, BAFSA, Construction Line and Safe Contractor approved, you can feel sure our commitment to service, workmanship and safety satisfies your every expectation.
